

## EQUIPMENT APPROVAL INFORMATION

Your telephone equipment is approved for connection to the Public Switched Telephone Network and is in compliance with parts 15 and 68, FCC Rules and Regulations and the Technical Requirements for Telephone Terminal Equipment published by ACTA.

### **Notification to the Local Telephone Company**

On the bottom of this equipment is a label indicating, among other information, the US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company

The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

- This equipment may not be used on coin service provided by the telephone company
- Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
- Notice must be given to the telephone company upon permanent disconnection of your telephone from your line.
- If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this product does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer

### 2 Rights of the Telephone Company

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the elephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations.

The telephone company may make changes in its communications facilities, equipment, operations or procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted

## INTRODUCTION

CAUTION: When using telephone equipment, there are basic safety instructions that should always be followed. Refer to the IMPORTANT SAFETY INSTRUCTIONS provided with this product and save them for future reference

Your Call Waiting Caller ID phone stores and displays specific information, provided by your local telephone company, to subscribers of Caller ID or similar caller identification services.

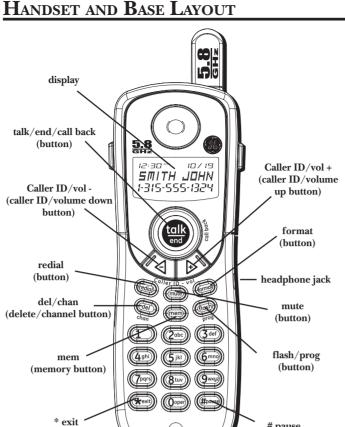

Your Call Waiting Caller ID phone enables you to:

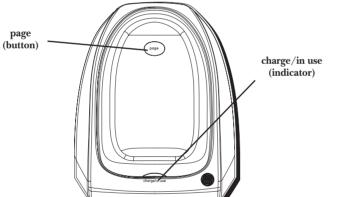

- Identify callers before you answer the phone.
- View the time and date of each incoming call. Record up to 40 Caller ID messages sequentially.
- Know who called while you were away.

To get the most from your new phone, we suggest that you take a few minutes right now to read through this user's guide.

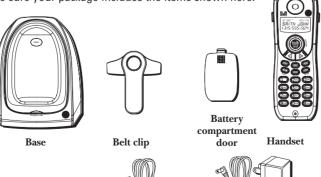

IMPORTANT: In order to use all of the features of this unit, you must subscribe to either the standard Name/Number Caller ID Service or the phone, you must subscribe to Call Waiting Caller ID Service.

IMPORTANT: Because cordless phones operate on electricity, you should have at least one phone in your home that isn't cordless, in case the power in your home goes out.

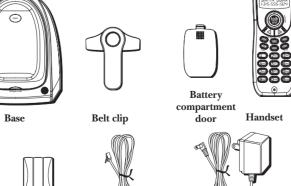

### Parts Checklist

Make sure your package includes the items shown here.

## BEFORE YOU BEGIN

AC power

## TELEPHONE JACK REQUIREMENTS

To use this phone, you need an RJ11C type modular telephone jack, which might look like the one pictured here, installed in your home. If you don't have a modular jack, call your local phone line jack company to find out how to get one installed.

### DIGITAL SECURITY SYSTEM

Your cordless phone uses a digital security system to protect against false ringing, unauthorized access, and charges to your phone line.

When you place the handset in the base, the unit verifies its security code. After power outage or battery replacement, you should place the handset in the base for about 20 seconds to reset the code. **INSTALLATION NOTE:** Some cordless telephones operate at

frequencies that may cause or receive interference with TVs, microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV, microwave ovens, or VCR. If such interference ontinues, move the cordless telephone farther away from these appliances. Certain other communications devices may also use the 5.8 GHz frequency for communication, and, if not properly set, these devices may interfere with each other and/or your new telephone. If you are concerned with interference, please refer to the User's Guide for these devices on how to properly set channels to avoid interference. Typical devices that may use the 5.8 GHz frequency for ommunication include wireless audio/video senders, wireless computer networks, multi-handset cordless telephone systems, and some long-range cordless telephone systems.

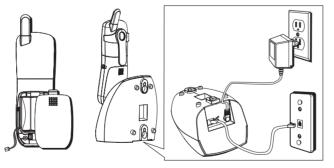

### INSTALLATION

### IMPORTANT INSTALLATION GUIDELINES

- · Avoid sources of noise and heat, such as motors, fluorescent lighting, microwave ovens, heating appliances and direct sunlight.
- Avoid areas of excessive dust, moisture and low temperature.
- Avoid other cordless telephones or personal computers.
- Never install telephone wiring during a lightning storm. Never install telephone jacks in wet locations unless the jack is
- Never touch non-insulated telephone wires or terminals, unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.

### Installing the Phone

specifically designed for wet locations.

1. Choose an area near an electrical outlet and a telephone wall jack (RJ11C), and place your cordless telephone on a level surface, such as a desktop or tabletop, or you may mount it on the wall.

Install the handset battery.

**CAUTION:** To reduce the risk of fire or personal injury, use only the battery 5-2459, which is compatible with this unit. **NOTE:** You must connect the handset battery before use.

- Plug the battery pack cord into the jack located inside the battery compartment, then place the battery pack inside the battery compartment.
- Put the battery compartment door back on.
- 3. Plug one end of the telephone line cord into the TEL LINE jack on the bottom of the base and the other end into a modular jack.
- 4. Set the RINGER switch (on the handset) to ON.

#### 5. Plug the AC power adaptor into the electrical outlet and the DC connector into the jack on the bottom of the base.

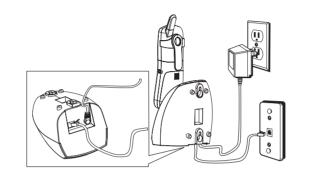

- 6. Place the handset in the base cradle. The charge/in use indicator turns on, verifying the battery is charging.
- 7. Allow the phone to charge for 12 hours prior to first use. If you don't properly charge the phone, battery performance is

compromised. **CAUTION:** Use only the ATLINKS USA, Inc. 5-2677 (black) power adaptor that came with this unit. Using other power

NOTE: The phone is tone dial only and does not support pulse dial mode.

### WALL MOUNTING

- . Slip the mounting holes (on the back of the base) over the wall plate posts, and slide the unit down into place. (Wall plate not included.) 2. Place the handset on the base cradle.
- SET UP

There are four programmable menus available: Language, Area Code, Ringer Tone, and Default Setting.

During programming, you may press the flash/prog button at any time to go to the next option. To exit the menu, keep the previous setting and return to the standby mode, press the \*exit button.

#### DISPLAY LANGUAGE

- 1. Press the flash/prog button until >1ENG 2FRA 3ESP shows in the display. "1ENG" is the default.
- 2. Use the Caller ID/vol (- or +) button or the touch-tone pad on the handset to enter your selection.
- 3. Press flash/prog again to save.

### Local Area Code

- 1. Press the flash/prog button until AREA CODE - shows in the display. "- - - " is the default.
- 2. Use the touch-tone pad on the handset to enter your three digit area
- Press flash/prog again to save.

NOTE: If you make a mistake, press the del/chan button to erase a wrong number.

## RINGER TONE

- 1. Press the flash/prog button until RINGERTONE > 1 shows in the display. "1" is the default.
- 2. Use the Caller ID/vol (- or +) button or the touch-tone pad on the handset to scroll to 1, 2, or 3.
- 3. Press flash/prog to save.

### DEFAULT SETTING

- 1. Press the flash/prog button until DEFAULT > NO shows in the display. "NO" is the default.
- 2. Use the Caller ID/vol (- or +) button on the handset to scroll
- 3. Press flash/prog to save. You will hear a confirmation tone.

### CORDLESS PHONE BASICS

### CHARGE/IN USE INDICATOR

The phone is ON when the talk/end/call back indicator on the handset and the charge/in use indicator on the base is lit. The handset and base indicators flash when you receive a call.

### Answering a Call

- 1. When the phone rings, pick up the handset and press the talk/end/call
- 2. When finished, press the talk/end/call back button or place the handset on the base cradle to hang up.

### MAKING A CALL

- 1. Pick up the handset and press the talk/end/call back button. Wait for the dial tone. The call timer starts counting minutes and seconds in the display.
- 2. Dial a telephone number.
- 3. When finished, press the talk/end/call back button again or place the handset on the base cradle to hang up.

### Pre-dialing

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Dial a telephone number (the number you dial shows in the
- **NOTE:** If you make a mistake dialing the number, use the del/chan button to backspace and erase the wrong number, and enter the orrect number
- 3. Press the talk/end/call back button on the handset. The number automatically dials and the call timer starts counting the minutes and seconds in the display.
- 4. When finished, press the talk/end/call back button again to hang up. NOTE: You may enter up to 32 pre-dial digits.

### REDIAL

While the phone is **ON** (in TALK mode), press the redial button to redial the last number you dialed (up to 32 digits).

While the phone is **OFF** (in standby mode), press the redial button and then the talk/end/call back button to redial the last number.

### FLASH

Use the flash/prog button to activate custom calling services such as call waiting, which are available through your local phone company.

TIP: Don't use the talk.end/call back button to activate custom calling services such as call waiting, or you'll hang up the phone.

### CHANNEL BUTTON

While talking on the phone, it may be necessary for you to manually change the channel to improve reception and reduce noise or static on the line. Press and release the del/chan button to move to the next clear channel.

Press the \*exit button to cancel any command you initiated.

### FINDING THE HANDSET

This feature helps locate a misplaced handset.

Press the page button on the base. The handset beeps continuously for about 2 minutes until you press the talk/end/call back button on the handset or the page button on the base.

**NOTE:** You may still page the handset when the ringer is off.

The ringer switch is located on the side of the handset, it has two

### RINGER SWITCH

positions, On and Off.

#### VOLUME

When the phone is **ON** (inTALK mode) press the Caller ID/vol (- or +) button to adjust the listening level. Choose from four volume settings. VOL 1 is the lowest volume and VOL 4 is the highest volume.

### MUTE

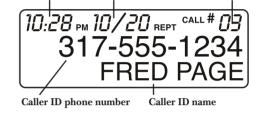

Use mute during a phone conversation to speak privately and off-line with a third party.

- 1. Press the mute button. MUTE shows in the display. The party on the telephone will not hear you.
- 2. Press the mute button when finished.

### CALLER ID (CID)

This unit receives and displays information transmitted by your local phone company. This information can include the phone number, date, and time; or the name, phone number, date, and time. The unit can store up to 40 calls for later review

Number of calls

## CALL WAITING CALLER ID

Provided you subscribe to Call Waiting Caller ID service from your phone company, you are able to see who is calling while you are on the phone when you hear the call waiting beep. The caller identification information appears in the display after you hear the tone.

• When you hear the call waiting beep in the handset receiver, press the flash/prog button to put the current call on hold and answer the incoming call.

**IMPORTANT:** In order to use this unit's Caller ID features, you must subscribe to either the standard Name/Number Caller ID Service or telephone number Call Waiting Caller ID Service. To know who is calling while you are on the phone, you must subscribe to Call Waiting Caller ID Service.

### RECEIVING AND STORING CID RECORDS

When you receive a call, the information is transmitted by the phone company to your Caller ID telephone between the first and second

When the memory is full, a new call automatically replaces the oldest call in memory. NEW appears in the display for calls received that have not been reviewed

NOTE: Check with your local phone company regarding name service

### REVIEWING CID RECORDS

As calls are received and stored, the display is updated to let you know how many calls have been received.

• Press the Caller ID/vol (-) to scroll through the call records from the most recent to the oldest

• Press the Caller ID/vol (+) to scroll through the call records from the oldest to the newest.

### Transferring Caller ID Records in Memory

- 1. Make sure the phone is OFF (in standby mode).
- 2. Press the Caller ID/vol (- or +) button to scroll to the desired caller ID. 3. Press the mem button.
- 4. Press a number key (0 9) to store the number in that memory location. You will hear a confirmation tone.

**NOTE:** It is important that you format the caller ID records correctly before storing in memory. It is not possible to re-format caller ID records stored in memory.

# TO REPLACE AN OLD MEMORY WITH A NEW CID

- 1. Repeat steps 1 through 4 in Transferring Caller ID Records in Memory. After you enter the memory location, REPLACE MEMO? shows in the display.
- 2. Press the mem button again, and the new CID record replaces the old memory in that location. You will hear a confirmation tone.

## DELETING THE CURRENT CID RECORD

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the Caller ID/vol (- or +) button to scroll to the desired record.
- 3. Press del/chan. The display shows DELETE CALL ID? 4. Press del/chan again to erase the record and the next Caller ID

### DELETING ALL CID RECORDS

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the Caller ID/vol (- or +) button to display any Caller ID record. 3. Press and hold the del/chan button until DELETE ALL? shows in the

record shows in the display. You will hear a confirmation tone.

4. Press del/chan again to erase all records. You will hear a confirmation tone. The display shows NO CALLS.

### DIALING A CALLER ID NUMBER

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the Caller ID/vol (- or +) button to display the desired record. 3. Press talk/end/call back. The number dials automatically.

The format button lets you change the format of the displayed

### CHANGING THE TELEPHONE NUMBER FORMAT

telephone number. The available formats are as follows. **7-digit** 7-digit telephone number.

**10-digit** 3-digit area code + 7-digit telephone number. **11-digit** long distance code "1" + 3-digit area code + 7-digit

1. Use the Caller ID/vol (- or +) button to scroll to the number you want

button to adjust the number, and try again.

2. Press talk/end/call back. The number dials automatically.

**NOTE:** If the telephone number cannot be dialed, press the format

## MEMORY

Store up to ten 24-digit 15-character numbers in memory for guick dialing. This memory feature is in addition to the CID memory log, which

## STORING A NAME AND NUMBER IN MEMORY

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Press the mem button.

stores up to 40 CID records.

3. Press the desired memory location (0 through 9) or use Caller ID/ vol (+ or -) to scroll to the desired memory location

**NOTE:** If the memory location is occupied, the memory location number and its contents show in the display. 4. Press the mem button again. The display shows ENTER NAME.

**NOTE:** If you don't want to enter the name, skip step 5. 5. Use the touch-tone pad on the handset to enter the name (up to 15)

characters) and press the mem button to save. More than one letter is stored in each of the number keys. For example, to enter the name Bill Smith, press the 2 key twice for the letter B. Press the 4 key 3 times for the letter I. Press the 5 key 3 times for the letter L. Wait for one second. Press the 5 key 3 times for the second letter L. Press the 7 key 4 times for the letter S: press the 6 key once for the letter M: press the 4 key 3 times for the letter I; press the 8 key for the letter T; press the 4 key twice for the

6. Press the mem button to save the name. The display shows ENTERTEL

- 7. Use the touch-tone pad to enter the telephone number you want to store (up to 24 digits).
- 8. Press mem again to store the number. You will hear a confirmation

**NOTE:** If you make a mistake press the del/chan button to backspace and erase the wrong character(s) or number(s).

### CHANGING A STORED NUMBER

- 1. Repeat steps 1 through 7 in Storing a Name and Number in
- 2. Press the mem button, and REPLACE MEMO? shows in the display.
- 3. Press the mem button to store the number. You will hear a confirmation tone.

### STORING A REDIAL NUMBER

- 1. Repeat steps 1 through 6 in Storing a Name and Number in Memory.
- 2. Press the redial button.
- 3. Press the mem button to store the number. You will hear a confirmation tone
- To replace an old number with a new redial number:
- 1. Repeat steps 1 through 6 in Storing a Name and Number in Memory. 2. Press the redial button.
- 3. Press the mem button, and REPLACE MEMO? shows in the display.
- 4. Press the mem button again to replace the old number with the new number. You will hear a confirmation tone.

**NOTE:** The stored redial number is limited to 24 digits or less.

### DIALING A STORED NUMBER

- 1. Make sure the phone is **ON** by pressing the talk/end/call back
- 2. Press the mem button.
- 3. Press the memory location (0-9). The number dials automatically.
- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Press the mem button.
- 3. Use the touch-tone pad or the Caller ID/vol (- or +) button to scroll to the number you want to dial.
- 4. Press talk/end/call back. The number dials automatically.

### INSERTING A PAUSE IN THE DIALING SEQUENCE OF A STORED NUMBER

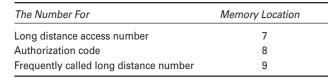

If a pause is needed to wait for a dial or access tone, press the #pause button to insert a delay in dialing sequence of a stored number (for example, after you dial 9 for an outside line, or to wait for a computer access tone.) pause shows in the display as a P, and each pause counts as one digit in the dialing sequence.

#### REVIEWING AND DELETING STORED NUMBERS

- 1. To review stored numbers, press the mem button, and use the Caller ID/vol (- or +) button to scroll to the memory location, or press the corresponding number key for a desired memory location (0-9).
- 2. When the data shows in the display, press the del/chan button. The display shows DELETE?
- 3. Press del/chan again to delete the data. The display shows

#### CHAIN DIALING FROM MEMORY

Use this feature to make calls which require a sequence of numbers. such as calling card calls to a frequently called long distance number. Each part of the sequence is dialed from memory. The following example shows you how to use chain dialing to make a call through a long distance service:

- 1. Make sure the phone is **ON** (in TALK mode).
- 2. Press mem and then press 7.
- 3. When you hear the access tone, press mem and then press 8.
- 4. At the next access tone, press mem and then 9.

**TIP:** Wait for the access tones before pressing the next memory buttor or your call might not go through.

## HEADSET AND BELT CLIP OPERATION

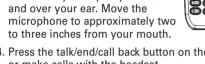

### CONNECTING AN OPTIONAL HEADSET TO THE HANDSET

## TELEPHONE SOLUTIONS

the modular phone jack?

No dial tone

- Check or repeat installation steps Make sure the base power cord is connected to a working electrical
- Make sure the telephone line cord is connected to the base unit and
- Disconnect the base from the wall phone jack and connect another phone to the same jack. If there is no dial tone on the second phone, the problem might be your wiring or local service.
- The handset might be out of range of the base. Move closer to the
- Make sure the battery is properly charged (for 12 hours).

Ensure the battery pack is installed correctly.

• Did the handset beep when you pressed the talk/end call back button? Did the in use indicator come on? The battery may need to be charged.

#### Handset does not ring

- Make sure the RINGER switch on the handset is turned to ON.
- You may have too many extension phones on your line. Try unplugging some phones.
- See solutions for "No dial tone."

Charge/in use indicator on the base flashes

· Provided your phone company offers voice messaging service and you subscribe to it, the charge/in use indicator on the base flashes when the phone is not in use to indicate there is a message waiting. It stops flashing after the message has been reviewed.

### You experience static, noise, or fading in and out

- Change channels
- The handset maybe out of range. Move closer to the base.
- · Relocate the base. Charge the battery.
- Make sure base is not plugged into an electrical outlet with another household appliance.

#### Unit beeps

- Place handset in base cradle for 20 seconds to reset the security code. If that doesn't work, charge the battery for 12 hours.
- · See solutions for "No dial tone."
- Replace the battery.

### Memory dialing

- Make sure you correctly program the memory location keys.
- · Make sure you follow the proper dialing sequence.
- · You must reprogram numbers into memory after a power outage or battery replacement?
