

DECT 6.0 **Cordless Handset** with Caller ID User's Guide

This accessory handset is for use with Model 25825 base unit

Please read this manual before operating this product for the first time

Model H5801

Important Information

Equipment Approval Information

Your telephone equipment is approved for connection to the Public Switched Telephone Network and is in compliance with parts 15 and 68, FCC Rules and Regulations and the Technical Requirements for Telephone Terminal Equipment published by ACTA.

Notification to the Local Telephone Company

On the bottom of this equipment is a label indicating, among other information, the US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company.

The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details

- This equipment may not be used on coin service provided by the telephone company.
- Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
- Notice must be given to the telephone company upon permanent
- disconnection of your telephone from your line.
- If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this product does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified

Rights of the Telephone Company

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may $% \left(\frac{1}{2}\right) =\left(\frac{1}{2}\right) \left(\frac$ temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance: (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations.

The telephone company may make changes in its communications facilities, equipment, operations or procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain

Interference Information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

Privacy of Communications may not be ensured when using this product.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna (that is, the antenna for radio or television that is "receiving" the interference).
- Reorient or relocate and increase the separation between the telecommunications equipment and receiving antenna.
- Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is

If these measures do not eliminate the interference, please consult your dealer or an experienced radio/television technician for additional suggestions. Also, the Federal Communications Commission has prepared a helpful booklet, "How To Identify and Resolve Radio/TV Interference Problems." This booklet is available from the LLS Government Printing Office Washington, D.C. 20402 Please specify stock number 004-000-00345-4 when ordering

Warning: The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Hearing Aid Compatibility (HAC)

This telephone system meets FCC standards for Hearing Aid Compatibility.

Licensing

ensed under US Patent 6,427,009.

FCC RF Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operated in conjunction with any other antenna or

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines when used with the belt clip supplied with this product. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

IC compliant statement

This Class B digital apparatus complies with Canadian ICES-003. appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Information for DECT Product

This telephone is compliant with the DECT 6.0 standard which operates in the 1.92GHz to 1.93GHz frequency range. Installation of this equipment is subject to notification and

coordination with UTAM. Any relocation of this equipment must be coordinated through and approved by UTAM. UTAM may be contacted at 1-800-429-8826.

Introduction

CAUTION: When using telephone equipment, there are basic safety instructions that should always be followed. Refer to the IMPORTANT SAFETY INSTRUCTIONS provided with this product and save them for future reference.

Congratulations on purchasing this RCA telephone. This system operates in the DECT 6.0 frequency range. This accessory handset will expand the phone systems for Model 25825.

Features:

- Caller ID
- Tone Dialing Intercom
- Call Transfer
- This telephone has been designed to be simple to use, however, you can reach its full potential more quickly by taking a few minutes to read this instruction book. This telephone is a multifunction product for use with Caller ID services available from your local telephone
- Your Caller ID phone allows you to: • View the name and telephone number of a caller while you are on
- the phone (Caller ID).
- Identify callers before you answer the phone. View the time and date of each incoming call.
- Record up to 40 Caller ID messages sequentially in each handset.
- Know who called while you are on the line or when you were away.
- Screen unwanted calls, eliminate harassment from annoying calls,
- or to get prepared before answering a call.

IMPORTANT: In order to use all of the features of this telephone, you must subscribe to the standard Name/Number Caller ID Service to know who is calling

Connections and Setup

Before Your Begin Parts Checklist

Make sure your package includes the items shown here.

Digital Security System

Your cordless phone uses a digital security system to protect against false ringing, unauthorized access, and charges to your phone line.

Important Installation Information

- Never install telephone wiring during a lightning storm
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
- Never touch non-insulated telephone wires or terminals, unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.
- Temporarily disconnect any equipment connected to the phone

such as faxes, other phones, or modems. Important Installation Guidelines

- Install near an electrical power outlet.
- Your handset charge cradle should be placed on a level surface such as a desk or table top.
- Avoid sources of noise, such as a window by a busy street, and electrical noise, such as motors, microwave ovens, and fluorescent liahtina.
- Avoid heat sources, such as heating air ducts, heating appliances, radiators, and direct sunlight. Avoid areas of excessive moisture or extremely low temperature.
- Avoid dusty locations.
- Avoid other cordless telephones or personal computers.

INSTALLATION NOTE: Certain other communications devices may also use the DECT 6.0 frequency for communication, and, if not properly set, these devices may interfere with each other and/or your new telephone. If you are concerned with interference, please refer to the owner's manual for these devices on how to properly set channels to avoid interference.

Installing the Handset Battery

NOTE: You must connect the handset battery before use.

CAUTION: To reduce the risk of fire or personal injury, use only the Telefield, Inc. approved Nickel-metal Hydride (Ni-MH) battery model T-2734 that is compatible with this unit.

- 1. Locate battery and battery door which are packaged together inside a plastic bag and are separate from the handset.
- 2. Locate the battery compartment on the back of the handset

- 3. Plug the battery pack cord into the jack inside the compartment. NOTE: To ensure proper battery installation, the connector is keyed and can be inserted only one way.
- 4. Place the battery pack in recessed area of the handset battery
- 5. Close the battery compartment by pushing the door up until it

Connecting the AC (Electrical) Power

Plug the power adaptor cord into the power jack on the back of the recharge cradle and the other end into an electrical outlet. The charge indicator turns on to indicate the battery is charging when the handset is on the cradle. Allow the phone to charge for 14 hours prior to first use. If you do

not properly charge the phone, battery performance is compromised.

CAUTION: To reduce risk of personal injury, fire, or damage use only the T-8BXD power adaptor listed in the user's guide. This power adaptor is intended to be correctly orientated in a vertical or floor mount position. Class (Classe) 2 Power source

button to scroll through the stored numbers. o Change: While viewing the record, press the Edit softkey

Follow Step 2 to 6 under Storing a Name and Number in Memory. To Delete: Press DIR/◀ on the handset, then press the VOL (+ or -)

- button to scroll to a desired memory. 1. Press the Delete/Mute button. Confirm? is displayed.
- 2. Press Select soft key to cor

Dialing a Stored Number

- 1. Make sure the phone is OFF (not in TALK mode). 2. Press the DIR/ d button.
- 3. Use the VOL (+ or -) button to scroll to the desired telephone
- 4. Press the Talk button to access an available line or select your preferred line. The telephone number dials automatically.

Caller ID (CID)

Caller ID (CID) is a service available from your local telephone company. For Caller ID to work on this system, you must subscribe to Caller ID service. This telephone system receives and displays CID information transmitted by your local telephone company. This information can include the phone number, date and time; or the name, phone number and date and time.

Receiving and Storing CID Records

When you receive a call, Caller ID information is transmitted by the phone company to your telephone between the first and second ring. The Caller ID information appears on your phone's display while the phone rings, giving you a chance to monitor the information and decide whether or not to answer.

If you are not at home or cannot answer, the telephone stores the nformation so that you can see who called while you were unavailable Caller ID memory automatically stores the call number, date, time, phone number and name for the last 40 calls. If Caller ID memory is full, a new call record automatically replaces the oldest call record in memory. At any time, you can review the stored information for the last 40 calls. Any calls received since your last review are marked as NEW in the display, to remind you to review them.

Reviewing Call Records

As calls are received and stored, the display is updated to let you know how many calls have been received.

1. Press the CID/▶ button first. The newest call record will be shown. 2. Press VOL (-) button to scroll to older call records. When you reach the oldest call. START/END is displayed.

3. Press VOL (+) button to scroll from the old records to recent ones. As you review call records, the display shows you the following information for each call:

- The telephone number of the caller.
- The name of the caller, if available in your service area. The Line Number on which the call was received.
- Time and date the call was received.
- NEW appears for all calls that have not been reviewed. NOTE: Check with your local phone company regarding name service

Transferring CID Records to Memory

You may transfer a Caller ID record to your phone's memory. NOTE: It is important that you format CID records correctly before storing in memory. It is not possible to reformat CID records stored in memory.

- 1. Use the CID/▶ button to scroll to the desired record.
- Press the Conf/Store button.
- 3. Use the VOL ($\dot{}$ + or -) to scroll to the desired numbe
- 4. Press the Conf/Store button and ENTER NUMBER is displayed. 5. Use dial pad to edit the number if need.
- 6. Press SAVE softkey to confirm, ENTER NAME is displayed.
- 7. Use keypad to enter the name.
- 8. Press SAVE softkey to save the record.

Dialing a Caller ID Number

When reviewing any call record in the Caller ID memory, you can dial

1. Make sure the phone is OFF (not in talk mode).

2. Press CID/▶ button once, then VOL (+ or -) button until the desired call record is displayed.

Depending on (a) how the incoming caller's phone number is formatted when received, and (b) whether or not you pre-programmed your local area code into memory, you may need to adjust the format of the caller's phone number before dialing it back.

The Format/Redial button lets you change the format of the displayed number. Available formats include:

Number of digits	Explanation	Example	
Eleven digits	long distance code "1" + 3-digit area code		
	+ 7-digit telephone		
	number.	1-317-888-8888	
Ten digits	3-digit area code +		
	7-digit telephone number.	317-888-8888	
Seven digits	7-digit telephone number.	888-8888	

NOTE: If the phone company does not supply all ten digits of an incoming caller's number, you will not be allowed to adjust the format of that

Scroll to the number you want to call back:

3. If the number does not dial as shown, press the Format/Redial button. Repeat if necessary, until the correct number of digits show in the

4. Press the Talk button. The number dials automatically.

Deleting the Current Caller ID Record

To delete only the record in the display:

1. Use the CID/▶ button and then VOL (+ or -) button to display the desired Caller ID record. 2. Press Delete/Mute.

Deleting All Caller ID Records

To delete all the Caller ID records in memory

1. Use the CID/▶ button and then VOL (+ or -) button to display any Caller ID record.

2. Press and hold Delete/Mute. The display asks DELETE ALL? for several seconds. 3. Press Select softkey again, within five seconds, to erase all records.

The display will return to standby mode.

Caller ID Errors

If there is an error in the transmission of information to your Caller $\ensuremath{\mathsf{ID}}$ phone, INCOMPLETE DATA is displayed.

If you have not subscribed to Caller ID service or it is not working, NO DATA is displayed.

Provided you subscribe to Caller ID service from your phone company, you may see who is calling.

IMPORTANT: In order to use all of the features of this unit, you must subscribe to either the standard Name/Number Caller ID Service.

Playback Voice Mail Messages

Caller ID

In idle mode, when new Voice message arrives, you can press PLAY softkey to access the mailbox by the password, default is "0000" 1. Press PLAY softkey in idle.

5. Then the unit will start to play back the messages in the selected Note: If there is no messages, it will prompt "You have no messages.

Press Zero for mail box option, Press # for exit". The user can press the digit for the related function. If there are some messages, it will prompt "Press 1 for new messages,

Press 2 for old messages, Press Zero for mail box option, Press # for exit".Then the user can select "1" for new messages play back. NOTF: The default play mode is receiver mode when press play softkey in

Note: If you want to change the mailbox password, you can press "0" whet the upon prompt emit, then press "5" to select "change the password", follow the voice prompt to change and save your new password.

Changing the Battery

CAUTION: To reduce the risk of fire or personal injury, use only the Telefield, Inc. approved Nickel-metal Hydride (Ni-MH) battery model T-2734, that is compatible with this

1. Make sure handset is OFF (not in TALK mode) before you replace battery.

2. Remove the battery compartment door.

idle, press Talk button can turn to Speaker mode.

 $\ensuremath{\mathsf{3}}.$ Disconnect the battery plug from the jack inside the battery compartment and remove the battery pack from the handset.

4. Insert the new battery pack and connect the cord to the jack inside the battery compartment.

5. Put the battery compartment door back on.

6. Place handset in the base or handset charge cradle to charge. Allow the handset battery to properly charge (for 14 hours) prior to first use or when you install a new battery pack. If you do not properly charge the phone, battery performance will be compromised.

Battery Safety Precautions

• Do not burn, disassemble, mutilate, or puncture. Like other batteries of

this type, toxic materials could be released which can cause injury. • To reduce the risk of fire or personal injury, use only the Nickel-metal

Hydride battery listed in the User's Guide. Keep batteries out of the reach of children.

• Remove battery pack if storing over 30 days.

NOTE: The RBRC seal on the battery used in your Telefield, Inc., product indicates that we are participating in a program to collect and recycle the rechargeable battery (or batteries).

For more information go to the RBRC website at www.rbrc.org or call 1-800-8-BATTERY or contact a local recycling center.

Troubleshooting Guide

Telephone Solutions

No dial tone Check and repeat installation steps:

Ensure the base power cord is connected to a working outlet. Ensure the telephone line cord is connected to the base and the wall.

• Connect another phone to the same jack; if there is still no dial tone, the problem might be your wiring or local service. • The cordless handset may be out of range of the base. Move closer to

- Ensure the battery is properly charged (14 hours). • Ensure the battery pack installed correctly.
- Did the handset beep when you pressed the TALK button? The battery may need to be charged.

Dial tone is OK, but can't dial out

• Make sure the type of phone service you are subscribed to is TONE. This handset is TONE only.

Handset does not ring

- Make sure the handset ringer is set to on.
- The cordless handset may be out of range. Move closer to the base.
- Check for dial tone. If no dial tone is heard, see No dial tone above.

You experience static, noise, or fading in and out

• The cordless handset may be out of range of the base. Move closer to the base

Charge the battery.

Unit beeps

- Clean charging contacts on cordless handset and charge cradle with a
- See solutions for "No dial tone" on previous page
- Replace the battery.

Memory Dialing doesn't work

• Did you program the memory location keys correctly?

• Did you follow proper dialing sequence?

Unit locks up and no communication between the base and cordless • Unplug the AC power adaptor from the wall outlet and the back of the

base, and remove the backup batteries from the bottom of base (if previously installed). Remove the handset battery. Wait for 30 seconds and plug the power adaptor back into the base and wall out, and re-install batteries in the base unit. Reconnect the handset battery and charge for 14 hours.

Caller ID Solutions

No Display

Is battery fully charged? Try replacing the battery.

 Make sure that the unit is connected to a non-switched electrical outlet. Disconnect the AC power supply from the base and reconnect it.

Caller ID Error Message

Caller ID information during the silent period after the first ring. This message indicates the presence of noise on the line. No Caller ID

• In order to receive Caller ID information, you must subscribe to the

standard name/number Caller ID service from your local telephone

• The unit displays this message if it detects anything other than valid

If you experience any of the following problems, even after fully recharging the battery, you may need to replace the battery pack:

- Poor sound quality
- · Limited range

General Product Care

To keep your unit working and looking good, follow these guidelines: Avoid putting the phone near heating appliances and devices that

- generate electrical noise (for example, motors or fluorescent lamps).
- DO NOT expose to direct sunlight or moisture. Avoid dropping the handset, as well as other rough treatment to the
- Clean the phone with a soft cloth.
- Never use a strong cleaning agent or abrasive powder because this will damage the finish.
- Retain the original packaging in case you need to ship the phone at a
- Periodically clean the charge contacts on the handset and charge cradle with a clean pencil eraser.

Causes of Poor Reception

- Aluminum siding.
- Foil backing on insulation.
- Heating ducts and other metal construction that can shield radio
- You're too close to appliances such as microwaves, stoves, computers.
- Atmospheric conditions, such as strong storms
- Base is installed in the basement or lower floor of the house.
- Base is plugged into AC outlet with other electronic devices.
- Baby monitor is using the same frequency.
- · Handset battery is low.
